

## **OpenCV Image Extensions**

OpenCV, a popular computer vision library, supports various image formats for reading and writing images in Python. Here is a list of common image extensions that OpenCV can read:

- BMP (.bmp)
- JPEG (.jpg, .jpeg)
- JPEG 2000 (.jp2)
- Portable Network Graphics (.png)
- Portable image format (.pbm, .pgm, .ppm)
- Sun Raster (.sr, .ras)
- TIFF (.tiff, .tif)
- WebP (.webp)
- OpenEXR (.exr)
- Radiance HDR (.hdr, .pic)

Note that the availability of these formats may depend on the specific version and installation of OpenCV.
